Description du produit :

The Large Wheeled Grip Bag (GRIP-3BOR) is a durable, rolling bag made weather-resistant military-grade 1000d Cordura fabric and water-proofed nylon-bonded triple-tacked stitching for superior water-resistance in a wide range of unpredictable field production conditions

The GRIP-3BOR is designed to carry all sorts of grip and electrical gear such as:

- Grip clamps and clips
- Electrical cables, meters, and power distribution
- C-Stands, booms, and jibs
- Camera rig equipment
- Light heads and lighting accessories
- Gloves
- Tape, tools and small toolboxes or crates

The GRIP-3BOR has smooth-rolling, off-road wheels with ball-bearings and solid steel axels for added strength. The wheels are also removable to help prevent damage during air-travel. The interior main compartment and the large front pocket are padded for extra protection. There are exterior pockets that will hold AC cords, cables, gel rolls and reflectors.

A padded interior divider kit is included that can be positioned to create three separate compartments or a single large compartment.

There are suede leather handles for carrying and a comfortable suede leather shoulder strap is included for carrying over the shoulder.

The Large Wheeled Grip Bag includes genuine suede comfort-grip heavy duty handles, padded suede heavy duty shoulder strap, as well as LED carabiner light for production in low-light conditions.
