Description du produit :

8SINN PANASONIC S1H CAGE

Cage for Panasonic Lumix S1H is equipped with all the characteristic features of 8Sinn products. Original modern design mixed with sturdiness and functionality, make a versatile and effective tool. Structure of this cage has been minimized, to make it as lightweight as it can be. Aside from everything else, this cage`s main role is to protect your camera and to be a base to attach essential accessories.

ERGONOMIC DESIGN AND ORGANIC SHAPE

Comfortable grip and soft lines of our designs are convenient in long-lasting usage. The cage does not interfere with camera body structure at any point and provides safe and comfortable grip. Our work around the Panasonic S1H has been carefully considered as to produce the best possible cage for this camera model.

ONE PIECE OF ALUMINIUM

Cage is made from one piece of air aluminium. This way of producing cages guarantees a firm

and damage resistant structure.

Upper section of the cage has been formed around the top of the camera in such a way, that allows the user free access to camera's buttons and LCD screen.

STRAP HOLDER

Comfortably located strap holder allows to use a hand strap of your choice and ensures steady holding of the camera.

EASY ACCESS TO BATTERY AND CARD'S OPENINGS

Panasonic Lumix S1H body has significant dimensions, as well as many functional points such as ports, slots and buttons. The cage does not block or cover any important sections of the camera.

MOUNTING POINTS

Standard 1/4" mounting points are essential for accessorizing your rig. Cold shoe mount has been placed on the right side, to grant additional mounting point for specific accessories.

M4 mounting points placed on the upper-front edge of the cage can be used to mount the 8Sinn Top Handles Extension Adapter, which allow to use the top handle and XLR audio adapter at the same time.
