Description du produit :

8SINN CAGE FOR ATOMOS SHINOBI

Using your Atomos Shinobi with the 8Sinn cage will help you to protect your monitor and to develop its capabilities.

ERGONOMIC DESIGN AND ORGANIC SHAPE

Frame-like cage has been carefully designed so that not to interrupt the monitor's structure.

ONE PIECE OF ALUMINIUM

The cage has been cut out from one piece of air aluminium, which makes it lightweight and durable at the same time.

BUILD IN TWO NATO RAILS

Top and bottom side of the cage serve as built-in NATO rails - standard solution for quick-release accessories.

EASY ACCESS TO ALL SOCKETS

Every plug and socket is easily accessible.

MOUNTING POINTS & HDMI CABLE CLAMP

Additional 1/4" mounting points on top and at the bottom of the cage, which are useful for extra accessories.

Cage is attached to the monitor by two 1/4" screws (top and bottom).

Bottom of the cage includes the 1/4"-3/8" reduction screw.

When the reduction screw is inserted, the mounting point is 1/4", when reduction screw is unscrewed the mounting point changes into 3/8".

Thanks to dedicated openings at the bottom, the Shinobi cage can be used with ARRI standard accessories equipped with anti-twist pins.

HDMI protective cable clamp - prevent the cable from being accidentally disconnected.

Set includes:

1pcs 8Sinn Cage for Atomos Shinobi

1pcs 8Sinn HDMI cable clamp
