Description du produit :

The E-jib arm is an ergonomic jib, constructed of high grade Aluminium which has been hard anodised for strength and integrity. Adjustable both front and rear of the jibs pivot point to make the unit easy to operate. The counterweight spindle is made to adapt standard weightlifting weights (Barbell) with a diameter of 30 mm. or 1 inch. Assembled in both over- and undersling configurations for optimum camera positions. The total weight of the case and E-Jib is 16 kilo. The Jib-arm folds down till 72 cm. and weighs no more than 11 kg. The Prosup E-Jib folds into an ergonomic configuration which allows easy packing into its Pelicase by a specially designed foam insert which also allows transportations of counter weights.
