Description du produit :

The Prosup Swivel has been designed specifically to work with the Lap Top- and Jem Dolly. The unit is attached to the LapTop's Euroboss (supplied with the camera dolly). The wheels under the seat pole absorb the weight of the operator whilst allowing easy circular movement around the level riser which support the users pan & tilt head. The seat pole is easily adjusted by means of a locker lever. A convenient lever locks the rotation of the seat swivel to a static position. Note: *Laptop dolly & Extendable Riser not included*
