Description du produit :

8SINN DIRECTORS MONITOR CAGE

Universal tool for a wide range of monitors with bottom attachment. Adjustable, foam covered handles with the widened top to provide safer grip during long usage (stop point in case of loosening your grip). Handles can be adjusted without tools, however, they have an option to use a 4mm allen key in case of screwing it too tightly. The backplate is equipped with M3 mounting points essential for mounting battery plates (V-Mount or Gold Mount). Free space with the 1/4" between the battery mounting plate and the back of the monitor gives room for mounting wireless transmitters. The cage also has the opening with the thumbwheel for stand mounting. To decrease friction between the monitor and the cage we placed some rubber pads at the bottom. Strap attachment can be useful to increase the safety factor. Comfortable preview on your current work.

The backplate of the cage has a pattern of mounting points appropriate for V-Mount and Gold

Mount Battery Plates which are the most commonly used battery types. 8Sinn Directors Monitor Cage works with FXLion Nano battery mount, perfect for smaller and lighter setups.

Dimensions: Length: 370mm (295mm when folded), Height: 107mm (center) 130mm (handles) , Width 86mm, Weight: 530g

Set includes: 1 pc 8Sinn Directors Monitor Cage
